AMERICAN FISHERIES SOCIETY / FISH HEALTH SECTION

AQUATIC ANIMAL HEALTH INSPECTOR RECERTIFICATION CONTINUING EDUCATION RECORDS

The 5 year continuing education requirement, of 60 credits, is obtained by attending short courses / workshops, scientific meetings (**sci.mtg**.)/ conferences, and university courses. One credit unit is awarded for each hour of attendance. Credits for university courses are based on either the semester (15 credits / sem. unit) or quarter unit (10 credits / qtr. unit). Thirty (30) credits must be earned from activities directly related to aquatic animal health inspection sampling, new pathogen detection, and bio-legal and regulatory related subjects (**AAH**). The remaining credits can be obtained from ***related fields**** including aquatic animal biology, veterinary or human medicine, microbiology, toxicology, pathology, water quality, pharmacology or other sciences that provide relevant continuing education. Presentation (**PRES**) of course materials or at scientific meetings provide the same number of credits as attending, however, multiple presentations of the same material can only be credited once during the renewal period. The applicant must retain independent documentation of all continuing education events (receipts, abstracts, certificates) and must produce such documentation if requested by the Professional Standards Committee. All continuing education credits offered for recertification are subject to approval by the Professional Standards Committee.
